

THE SMART AUDIO COLLECTION

2018

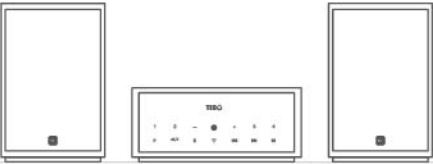

TIBO 2018

Welcome to the TIBO Smart Audio Collection.

We have been working really hard to develop one of the most extensive ranges of Smart Audio products. All products are compatible with the free TIBO app and on the top of Wi-Fi connectivity, they all feature Bluetooth and Line-in inputs, whether you prefer traditional 2 channel Hi-Fi sound or a single stereo speaker - TIBO has it all.

Please sit back and read through our selection. We are sure you will be excited by the choice available.

TIBO Smart Audio

With the deceptively simple TIBO Smart Audio family of products, users can create a multi-room, multiplay sound system in seconds.

All TIBO Smart Audio products feature the following technologies:

TIBO Bounce allows users to 'bounce' audio signals around their home from one speaker to another. With TIBO Bounce, audio can be streamed from any source via smart devices, anywhere in the house. All you have to do is connect an audio source to one of the TIBO Smart Audio products.

All TIBO Smart Audio speakers are Hi-Fi Ready and connect wirelessly with ease. Join two for superb stereo. When connecting two speakers, one can be made left and the other right giving true Hi-Fi stereo sound.

Hi-Res Audio closely replicates the sound quality that musicians and engineers are working with in the studio. The digital processes and formats used to achieve this, have higher sample rates when compared to the standard process used in producing CDs. TIBO High-Res Audio supports 24 bit / 192KHz which is 6.5x more data transmitted when compared to CDs.

More TIBO Technologies, please check P21.

Streaming radio from the internet has now been easier – simply store any of the thousand online stations on your pre-sets either on the product or in the TIBO app.

With the TIBO app, one touch allows users to access and control all TIBO products to their single or multiple Smart Audio products. The Free TIBO App is available for both iOS and Android platforms.

The highly functional features of the app also allow users to control and configure their system settings as well as determine pre-set for internet radio and play lists.

Choros Range

TIBO's Choros range of speakers take listening to a whole new level. The series - Choros 2, 4 and 6, Choros Porta, Choros Talk and Choros Tap, the UK's first third party multiconnect and multiplay active speakers supported by Amazon Alexa. The Choros Smart Audio products sounds great in single mode but more than double up if set-up in stereo mode.

Simply start with one and build from this. The Choros range - designed with a deep understanding of music, acoustics and electronics.

Kameleon Touch with Amazon Alexa

Kameleon 4

Kameleon 6

Kameleon

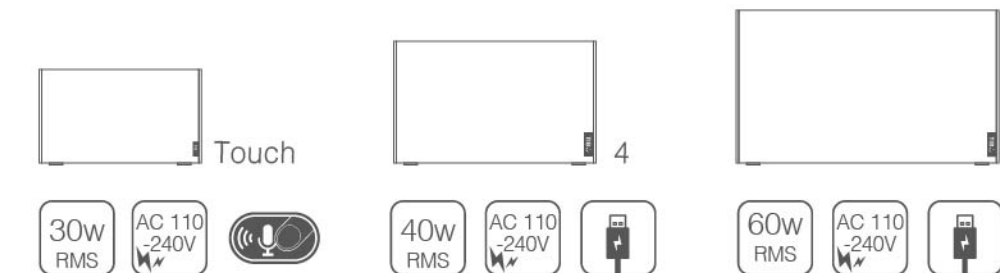

TIBO Kameleon Smart Audio - Kameleon Touch, 4 and 6.

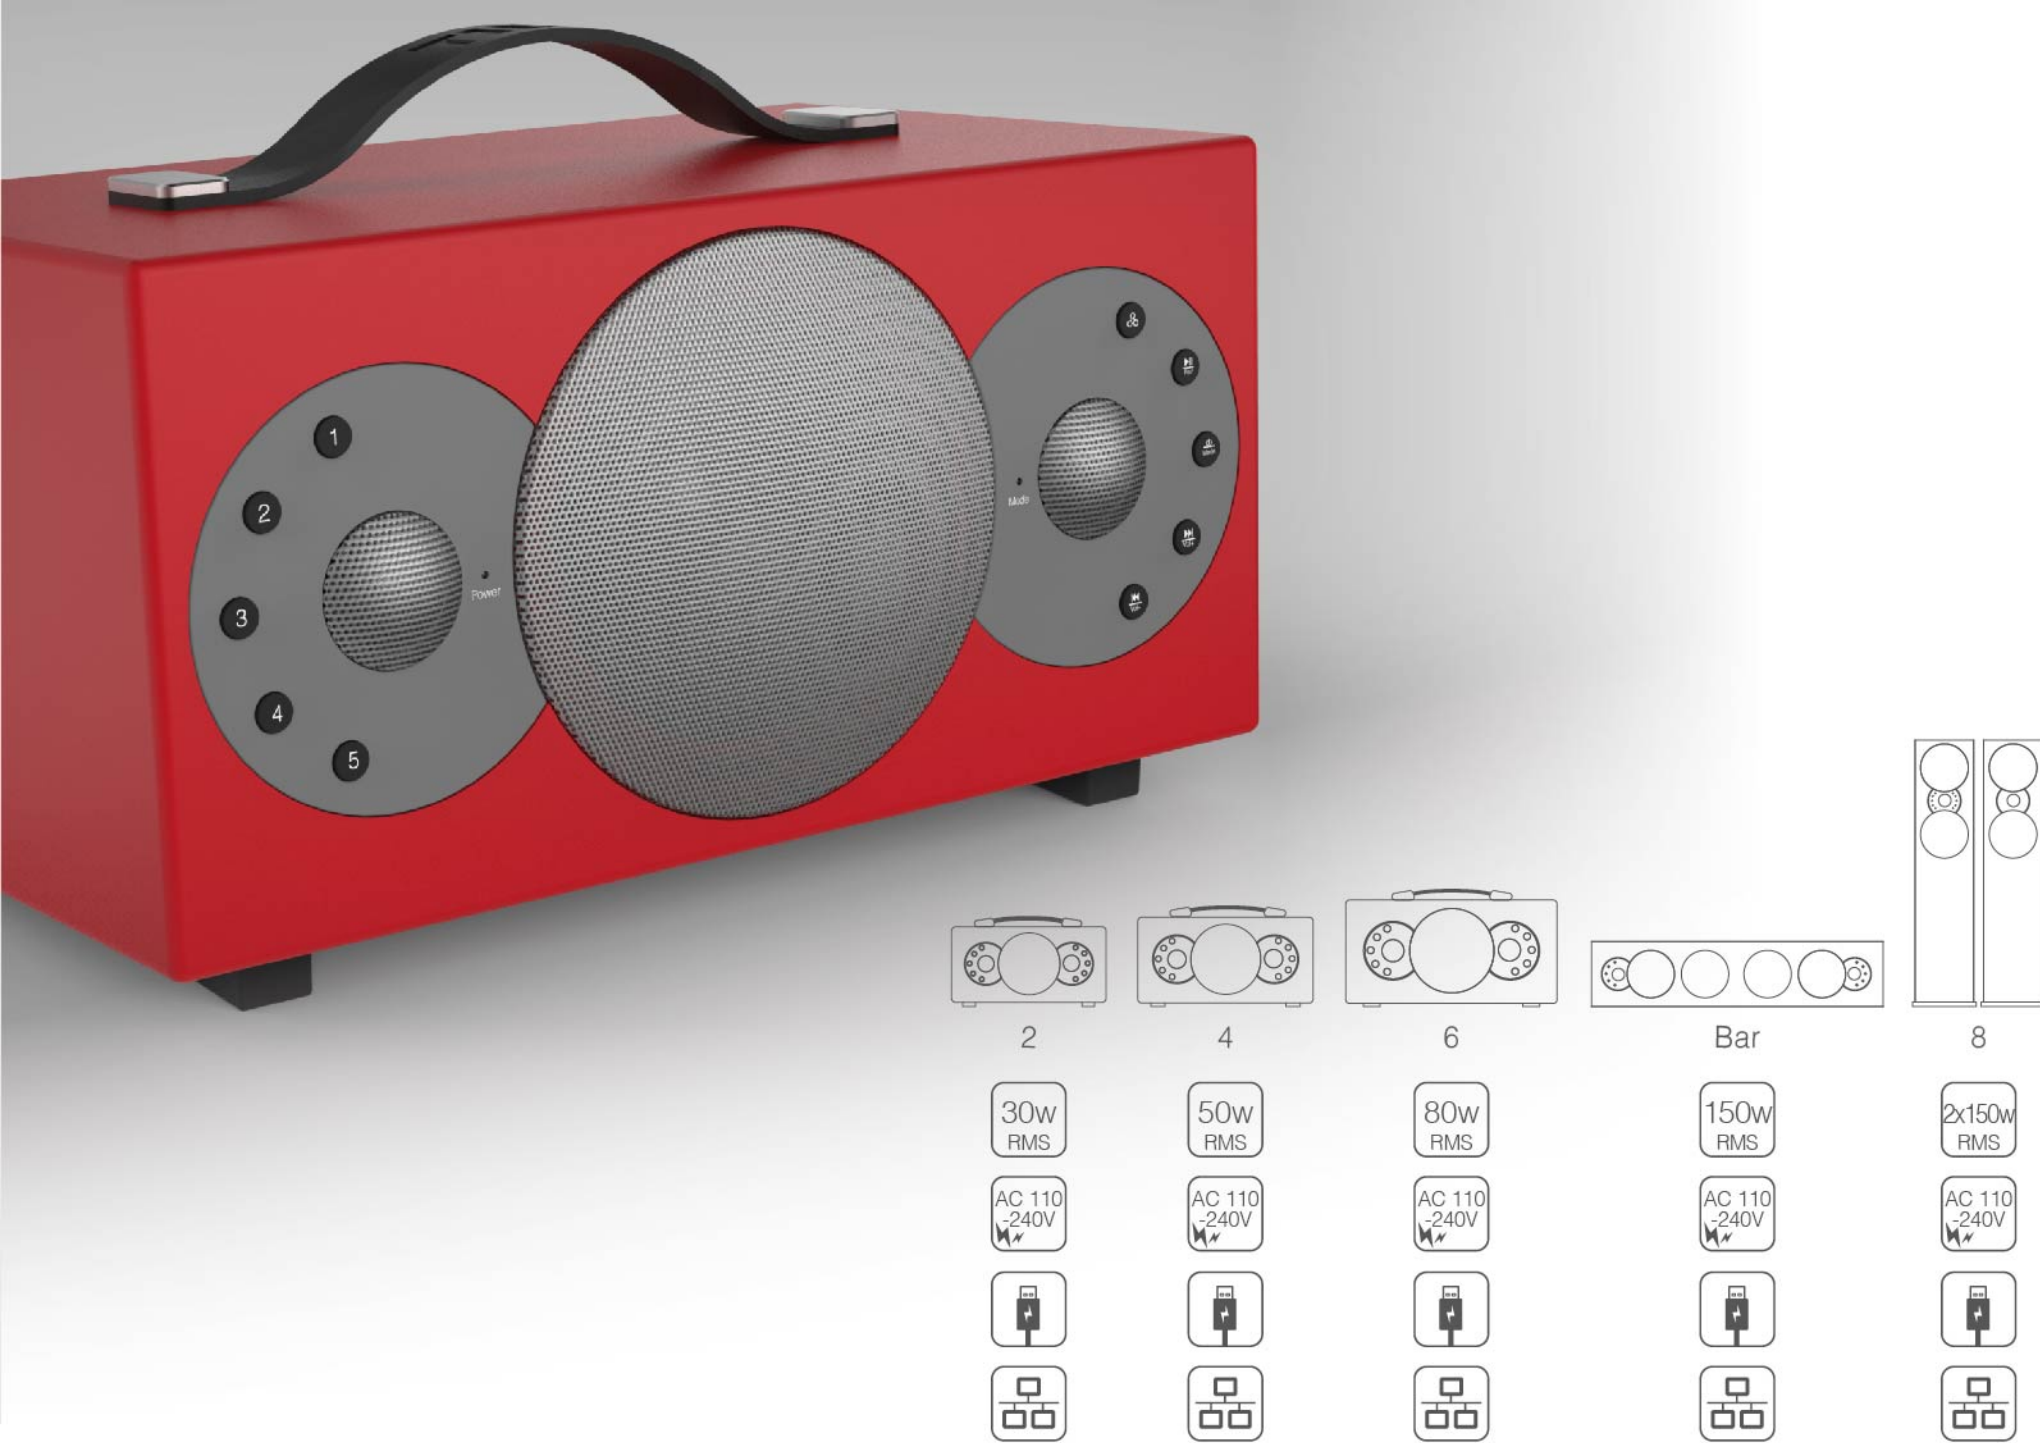

Kameleon Touch uses latest Amazon near field voice activation control technology. You can ask any questions, place orders or arrange your schedule by a single touch.

All Kameleon speakers comes with 3 sets of changeable panels, white, dark grey and walnut, for matching your home decor.

3 sets of changeable panels

Sphere

Sphere 2, 4 and 6 are built to be powerful and portable. With more than 8 hours of battery life, our Sphere speakers can be enjoyed anywhere.

If you are looking for great TV sound, look no further than the Sphere Bar. For traditional Hi-Fi stereo sound, choose between either Sphere 8 and 10, for elegant and powerful active floorstanding speakers. All Sphere models are available in a contemporary selection of colours.

Vogue

The Vogue range are not just pleasurable to your ears with great UK sound, they are also pleasing to the eye with their contemporary modern design.

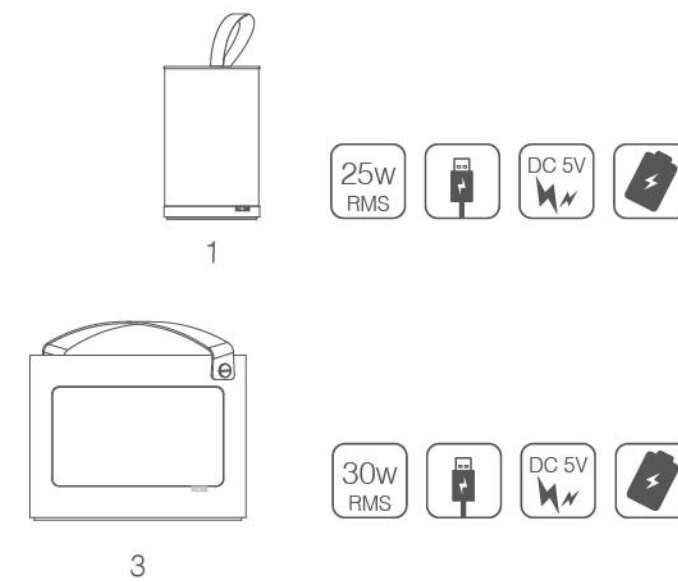

Both Vogue 1 and 3 have battery built-in enabling you to play your favourite tracks for up to 8 hours anywhere you like. You can even charge your smart device if you are out and about.

Alchemy - Black

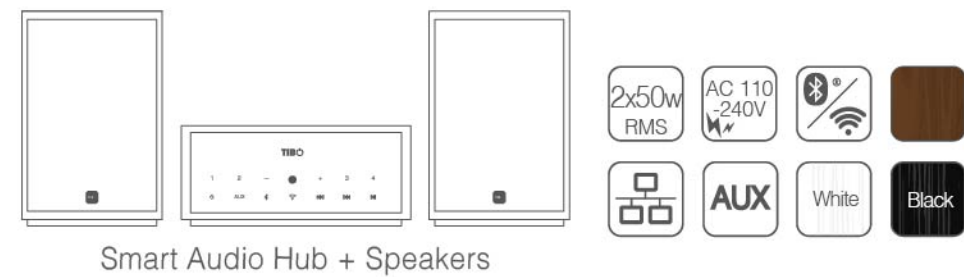

Alchemy - White

Alchemy - Walnut

The Alchemy system offers the best of both worlds in Smart Audio technology and traditional Hi-Fi. The combination not only sounds fantastic due to the 2 separates high quality speakers and very powerful digital amplifier, the Alchemy Mini System brings a completely new level of build quality for mini Hi-Fi systems.

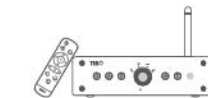

Smart Streamer + PA150 + Harmony 8

Smart Audio Classic

TIBO appreciates great sound and connectivity. The Classic range offers several inputs for connecting multiple sources, such as TV, CD, Turntable and NAS drive...etc.

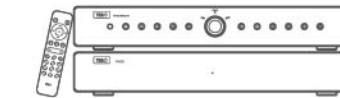

All products give you the options to match your current Hi-Fi speakers by offering 3 different output power from 2 x 50W up to a powerful 2 x 150W.

Bond 4 + Harmony 2

Bond

The Bond range is developed for customers who already are happy with their current music system. They simply like to upgrade to Smart Audio.

The Bond Mini connects to the current system and let you stream music from your mobile devices. In addition, to the features of Mini, Bond 2 has Bluetooth and Line-in inputs, pre-sets for internet radio and trigger function for active speakers. The Bond 4 offers 2 x 50W output power in addition to the Bond 2 features.
